

Hi There,

We're writing to our fellow NAACOs attendees to invite you or anyone on your team to join us for a roundtable discussion on September 22nd. The topic is "Understanding the Importance of SDoH at the Local Level: Perspective From Providers", led by three physician panelists: Gina Basello, DO of Jamaica Hospital; Naiomi Jamal, MD of Swope Health; and Sabiha Raof, MD of MediSys Health Network.

They'll share their perspectives on how clinicians and staff are assessing, understanding, and addressing social determinants of health for their organizations and communities.

As we continue to expand our reach across the country, we want to make sure that we are equipping you and your teams with the right tools and information so you can best serve the communities in which you operate.

Ultimately, so you can best serve the communities in which you operate.

We hope you or anyone on your team can join us!
